 [efcausa.com](https://efcausa.com)

Efcausa was founded in 2013 as a packaging company with our manufacturing activities for food and non-food industry to our clients with wide range products.

## VISION

Our vision is to be a leader company for quality service to their clients without compromising regarding packaging solutions to maintain renowned and trusted company.

Our vision strongly reflects who we are; tough, hard-working, and detail oriented. It is that special mark that allows us to stand above the crowd.

## MISSION

Efcausa mission is to lead the industry and enhances our client's business by offering professional and speedy services. As our clients' packaging partner, our mission is also presenting many kind of packaging options and varieties with maximum level. Efcausa targets to present the most efficient and best quality with unique products that make our clients high visual brands to make difference in the market.

The main theme formation of the company is to follow up national and international standard closely without compromising. Efcausa is performing continuous selfrenewal and current technological developments.

## Company Standards

Efcausa targets to supply sustainable partnership to our clients with getting their satisfaction. Efcausa aims to reduce waste through reduction and recycling, increase performance, while ensuring food safety.

This demand has largely been driven not only by the public at large, but also our standards. In this case, we are capable to use FSC products and also our production is under BRC Food Standard certificate qualifications.

# PETRA WITH LID

## NEW SHAPE OF PACKAGING!

Meet our officially patented new trays!

Efcausa targets to produce solutions for industrial packaging and offers many product families for this purpose. PETRA is the newest solution that the company offers. The products can be produced from many types of papers, such as PE, PET, aseptic barrier coated, or home-industrial compostable. With different types of raw materials, Efcausa wants to change plastic to a more sustainable solution; paper!

The goods can be customized with printing or with new dimensions. Please get in touch with further information.
