ABOUT EFCA USA

EFCA USA is aware that it is necessary to follow the global developments in the field and walk quickly, without being satisfied with the success it has achieved in the field of printing.

The ever-evolving technology and changing needs are a positive force for EFCA USA.

About Us

In 1990, after mastering the offset printing cutting sorting machines that I bought from my father in my second year, and being guided by management and consultancy in many companies, in 2006, it became a solution for a sensitive and automatic filling factory such as standard boxes, stationery, cosmetics, spare parts, laundry and cigarette actuators. 2018

We started to invest in boxes and packaging. After the growth of the pandemic and the closures, we recorded investments in this sector. In this short time, we have become a solution partner for many large packaging additives with this service and we still provide technical consultancy services to many companies. At the same time, we import and export in many countries. After the factory in Istanbul, we go to Florida Miami. As PACK, we started our activities to offer solutions to companies abroad after Turkey and Europe by offering our experience.

Export

We not only produce the orders received, especially with Fast Food, Grocery Products and Cargo Packaging products, but also provide consultancy services on product development, cost optimization and improvement in transportation conditions and costs to our European customers to whom we have been exporting for many years.

Paper Cardboard Imports

In addition to the selection of qualified cardboards needed by the Cardboard Packaging Industry, which has been developing rapidly in our country in recent years, and their supply at affordable costs, the added value they will provide to our products with their optimal use in production and superior features is becoming increasingly important.

Efcaa is not only your supplier, but also your business partner that will increase efficiency, thanks to its many years of experience in Cardboard Packaging Production and especially its cooperation with European countries.

Pizza Boxes

Special Pizza Boxes Solutions for Your Company

SMALL PIZZA BOX	10 Inches	26x26x4,7cm	260x260x47mm
